Ethics

What is the right thing to do?
How can we make sure that we do no harm?

Sharing

Sharing is an important skill to learn. It can be tricky to do at times but sharing allows us to learn to trust each other.

When we share our toys, teck or equipment with each other it is really important we treat each others property with respect. If we don't they probably will not want to share in the future.

When we share our ideas, thoughts and personal information with each other it is also really important that we treat this information with respect.

Responsibility

When we share information it is important to think about what is the right thing to do in different situations.

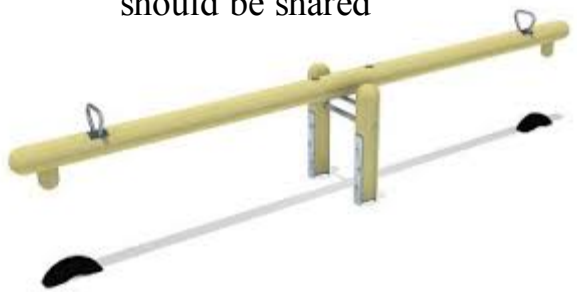
By choosing to be respectful with information that has been shared you are showing that you can be responsible.

By being responsible with information that has been shared you will build trust and keep everyone safe.

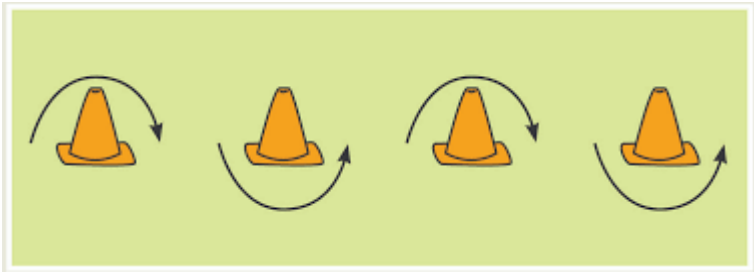
The rocket is your escape route. At any point in the project you are free to leave and return to class.

Would you like to join our research project?

Confidentiality: what information should be shared



Pressure: participants should not feel pressured to participate, do you want to participate?



Time: how long will it take?

Costs: finance, emotional, lose free time …

Topic of research: what it's about

Information safety: what will happen to the data (where will it go), where will it be saved, who will see my data (family friends)

Share our research

A friend tells you that they have a girlfriend in class but they don't want you to tell anyone.

When interviewing students someone tells you about how they are feeling lonely.

Personal information

A friend tells you that their boy friend keeps hurting them but they don't want anyone to know.

When interviewing a student they tell you where they live.

When interviewing someone they tell you how much they love building model planes.

When interviewing students someone tells you they don't want to carry on.

When interviewing someone they ask that you do not share what they have told you.

Thinking about the right thing to do.

Keep the information private by not sharing it with others.

Right about the information that you have collected.

Tell a responsible adult straight away.

Discuss the information that you have collected with other people in the project.

Share on social media. Instagram, video and chat.

Share the information that you have collected but don’t add anyone's name.
